The SloanSecure™ welded wire design can be customized to meet aesthetic design and desired security needs.

- Multiple post, rail, and fence topping options
- Multiple options for galvanizing/coatings
- Different fence heights available
- Integrates with SloanSecure™ Cable Barrier

SINCE 1991

Sloan's Story

In 1991, Ed Sloan started Sloan Forest Construction to serve local timber mills and help his four teenage sons earn money for college. With the collapse of the forestry industry, they began fencing remote properties.

In 1998, Sloan won the contract to secure Mountain Home AFB. In 2006, Sloan emerged as the go-to national security provider via its innovative security perimeter work in the Missile Defense Program.

In 2018, Sloan designed and built two record-breaking pop-up barrier systems for a Fortune 10 client. After 30 years of hard work, Sloan is the global leader in constructing the advanced security infrastructure needed for distinctive brands and institutions such as Facebook, DoD, DoS, and others to accomplish their mission.
